

Depression
is **not a choice**
but **treatment is!**

Dr. Ahmed with
Dr. Elsadre / CEO of The PsyClinic

THE PSYCLINIC

A REGIONAL LEADER IN MENTAL HEALTH

Have you already tried antidepressant medications? Are you concerned about its safety and side effects? Do you feel like it's not effective?

That's when you need to...
Rethink your treatment choices

TMS is the first FDA approved non-drug treatment for depression now available at The PsyClinic. Using a highly targeted non-invasive magnetic Pulse to stimulate nerve cells in the area of the brain that controls depression called the left prefrontal cortex. The Magnetic Pulses stimulates the neurotransmitters of the brain, producing more Serotonin (the Happiness Hormone) reducing symptoms of depression.

- Non-drug, non-invasive
- No medication side effects
- Covered by most insurance
